PRODUCT OVERVIEW

[Nekoosa's overlaminate films](#) enhance overall graphic depth and protect printed materials from UV radiation, environmental elements, moisture and abrasion. With a variety of finishes and mil thicknesses to choose from, Nekoosa has a wide range of overlaminate films to fit your specific graphic needs.

Calendered Vinyl Overlaminates Film

The portfolio includes 3.2 mil calendered vinyl overlaminates available in gloss, matte and/or luster finishes with a new 78# paper liner for improved wet out performance. These overlaminates are rated for <4 years of outdoor use and are equipped with enhanced UV protection. They are versatile and great for everyday use!

We also offer 4 mil clear, double polished and 6 mil semi-rigid clear embossed options that are UL 410 slip resistant certified for floor graphic overlaminates. These calendered vinyl overlaminates are paired with a clear polyester film liner that keeps the adhesive smooth and prevents orange peel. The best part? They are suitable for indoor floor graphics <6 months and withstands normal floor maintenance and cleaning.

Polycarbonate Overlaminates Film

Also included in the portfolio are polycarbonate overlaminates options available in 3, 5 and 10 mil with a velvet matte finish. Formerly known as RTape Eclipse™, these overlaminates are rated for <2 years of outdoor use. With a clear polyester film liner, the polycarbonate overlaminates also do a great job of keeping adhesive smooth and preventing orange peel. In addition, the clear non-yellowing permanent solvent adhesive makes for brilliant clarity.

They are durable, thick and scratch resistant – perfect for roll up banners, trade show panels, gas pump skirts and warning labels.

Polyester Overlaminates Film

Our 1 mil and 2 mil polyester overlaminates offer a high gloss, scratch resistant finish and are rated for <4 years of indoor use. For your ever changing point-of-purchase messaging, we recommend using our 1 mil option with a dry erase coating. It's perfect for frequently updating menu boards and restaurant signage.

Two New Overlaminates Videos on YouTube

We've created two new videos that are live on our Nekoosa YouTube channel. The first, "Nekoosa's Mojave Overlaminates Films Portfolio" overviews our offering. The second, "How to Select the Correct Overlaminates Film" helps in pairing substrates with overlaminates.

FEATURED APPLICATION

Pair Walk-On Graphics® with Overlaminates

Combine Walk-On Graphics® with Nekoosa's 4 mil double polished or 6 mil embossed [Mojave calendered vinyl overlaminates](#) for a UL 410 slip resistant, durable floor graphic.
